As Surrey grows, would you prefer for the ratio of fire fighters to citizens to increase (that is, more firefighters in relation to the overall population), remain constant (that is, the number of fire fighters would grow proportionate to city growth), or decrease (that is, fewer fire fighters in relation to the overall population)?

As you may know, there is not enough fire equipment and trucks in each community to effectively manage even small scale emergencies in Surrey. Virtually every other city in Canada has more fire equipment and trucks closer to existing homes and businesses than Surrey. Thinking about this, would you support or oppose increasing the number of fire trucks in Surrey?

The equipment and fire fighter training required to attack high rise fires and emergencies is highly specialized. Would you support or oppose establishing another fire hall in Surrey, specifically tailored with the appropriate equipment and fire fighters for managing emergencies and fires in high rise buildings?
